## Mount Scopus Memorial College 2011 Parent Satisfaction Survey Results

Every year we survey our parents to learn their feelings and thoughts about the College and how we are performing. The results in 2011 continued to build upon those of the previous years. A brief summary is presented here.

First and foremost, over 95% of parents believe their child is happy or very happy attending Mount Scopus. Knowing that their child is happy to get up in the morning and prepare for their school day is an excellent starting point. A similar proportion rated the high satisfaction with the quality of education, demonstrating tremendous faith in the educational delivery across all levels of the College.

Over 90% of parents expressed their belief that teachers in both general and Jewish studies throughout the College engaged and stimulated their children to learn. This was supported by parents' belief that their children received the individual attention they need to learn effectively and to challenge themselves. Parents indicated on the whole that the College communicated appropriately about their child's progress throughout the year.

In non-educational areas, our parent body overwhelmingly expressed great support of, and faith in, the leadership of the College, coupled with the belief that the College continues to improve year on year. We are mindful and grateful of the opportunity that parents provide us with as partners in educating their children and are always keen to receive feedback. The annual parent satisfaction survey is one key measure we use to evaluate, and continually improve our performance.
